PHOTOGRAPHIC TRANSFORMATION OF CUBISTIC IDEAS

A series of everyday objects. The series was made, using a special, analogue technic with overlappings and by-chance-elements. It-s like a cubistic way of photography: different positions, zooms and times in one picture. The series was printed in the real size of the pictured objects.

COMPACT/TOOL___SERIES OF VINYL-RECORDS

SERIES OF SAMPLING-LOOP-TOOLS (100 LOOPS/RECORD, EDITION 500)

COMPACT/TOOL is a series of 12-inch-vinyl-records based on endlessloops. This are 1,8-second long pieces of sound which repeats as often as the DJ intends to. The loops on COMPACT/TOOL are either out of autobiographic context (my favorite record etc.) or edited by other artists. The COMPACT-vinyl-series is planned from side a to z. Each side contains 50 x 1,8 seconds-sounds. This micro-units can be used as a modular repertoire for soundartists or DJs. Therefore COMPACT-series, mixer and turntables can be seen as an instrument. COMPACT/TOOL is released on the label „normoton“ in an edition of 500.

PERSONAL POP... LISTEN TO YOUR OWN SONG...SERVICEART

„GIVE ME YOUR FAVORITE NOISE, I-LL CREATE A POP SONG FROM IT“

The idea of PersonalPop (PP) is to create a popsong out of every noise you want. The customer provides his favorite noise, taped from the PP-Expert (me). The Expert then creates a piece of individual pop-music (2-4 minutes long) from only this noise and it-s backround-sounds. The production-time is one hour. The customer gets his music-piece in a nice, individual CD-Cover with label in an edition of his own choice.

PP is a booth for fairs (artfairs, designfairs), including 2 bar-stools and a presenter-table.
The tools are: computer, microphone, printer.
